SESSION 2: Preparing for the Post-COVID World Using Primary Care Data

Presenter: Dr. Andrew Pinto, Public Health and
Preventive Medicine Specialist and Family Physician at St.
Michael's Hospital

Discussion Panel Members:

Kylie Peacock, Patient Partner and BRIC NS Advisory Council
Member

Matt Holland, Manager, Planning and Development, NSHA
Primary Health Care and Chronic Disease Management

Dr. Mathew Grandy, Practicing Physician and Network Director
for the Maritime Family Practice Research Network (MaRNet-FP)

In the wake of COVID-19, primary care systems across Canada have shut down, adapted, or transformed rapidly. For many patients, particularly those who experience complex healthcare needs, this disruption has created gaps and left them uncertain about future care. Frontline primary care providers and health system decision makers are facing the challenge of how best to shape practice and policy to address this. Dr. Andrew Pinto and panelists will discuss how primary care data may be a valuable tool to appropriately prioritize and respond to patient needs as primary care systems emerge beyond the peak of COVID-19.
